munity college for everyone," Rep. Chap-man said.
"Before 1710," she explained, "a high-school district could form a study com-mittee and eventually call a referendum to determine if a jusific college was needed.
If the need was there, the high school district could then offer the 15th and 14th school year with the district's superinten-dent heading the so-called jusifor college."

"JUNIOR COLLEGE education now is not an extension of the high school," Mrs. Chapman said.

H. B. 1710, has eradicated the high school extension idea by 1) creating the IJCB; (Illinois Junior College Board 2) distinguishing between two classes of junior colleges.

# Tired of the same old meat balls?

# These are different

The Swedish people are internationally famous for their meat balls or as they call them "Kottbular". Other countries specialize in meat balls too, although sometimes they are known by other names. The Spanish call their meat balls "abondigas." And the character of the dish is as different as its name. The dish is a different as its name, and the dough is made with potatoes. So, really, they are a kind of dumpling with the meat ball inside.

side.

Then the meat balls are served with a choice of cold applesauce and hot currant sauce. The Spanish people like to use one sauce on one meat ball and the other on another. Angostura is used in this recipe both as a seasoning agent and a flavoring, giving it a richer, zestier taste enjoyed by the Spanish. ## Let an oriental banquet highlight your next-meal

Just as some Americans feel that their personalities ar annuenced by the sign of the zodiac under which they were born. he poet who said "all that ers is not gold" probably did think of the glamour beads are today's fun-project for and girls. However, he d have included them be-tween you sprinkle ordina-quash seeds with tinsel they sparkle so beautifully you d hardly guess what they

squash at your house, ask for the seeds so you can make a string of glamour beads. The first thing to do after you have cleaned them is to string them on a length of silver cord like that used to tie Christman packages. Thread the cord into a needle of medium size. Push the needle through a seed near the pointed

end and carefully pull the cord through (Figure 1). Then press the needle through the same seed again and once more pull the cord through. This will deep the seeds flat. Add enough seeds to form a neckace, spacing them about three-fourths of an inch apart.

## FERRY HOUSE and FERRY HOUSE KITCHEN

Van Cortlandt Manor-Sleepy Hollow Restoration

These buildings were always rented by the Van Cortlands to a tenant ferryman. The guests at the Ferry House were entertained in the two rooms to the left of the entrance hallway. The front room, called the Common Room, gave travelers an area where they would have privacy and the entertainment of games, such as chess and checkers. The Tap Room, belin, was the room where stage drivers, cattle drovers and farmers exchanged news, ate and drank.

The Ferry House Kitchen, of brick, is a reconstructed Hudson Valley one-room house of the type found between Manhattan and Albany from the 1640's through the 1790's. The foreroom of this building has a large hooded freplace used for heating, cooking and the smoking of meat hung high, in its chimney. The furnishings of the lean-to room were used for serving and storing food. In this building was done all of the cooking for the guests in the Tavern.

TORS AND CATCH GAMES By Coppy Dick

Here's another in my series of homemade games that are fun to make and to play, I'r calade Toss and Catch and it consists of an egg carlor and 10 bottle caps. Such objects are indeed easy to round up without any expense, yet the completed game is as much fun to play as many ready-mades that cost a great deal.

great deal.

The only special preparation is applied to the egg carton. With your poster or paints or crayons, color the compartments as indicated in Figure 1, making four of them red, four of them green

The player with the carton tries to catch the bottle caps in the egg tray and especially in the compartments having the highest point value. The red sections are worth 25 points and the black sections are worth the points and the black sections are worth five points.

After the 10 bottle caps have been tossed and caught — or missed — the catcher's score is added up and the players change

positions.

The player who makes the most catches and earns the higher total of points wins the game.
